Section 1. Overview

1.1. Purpose

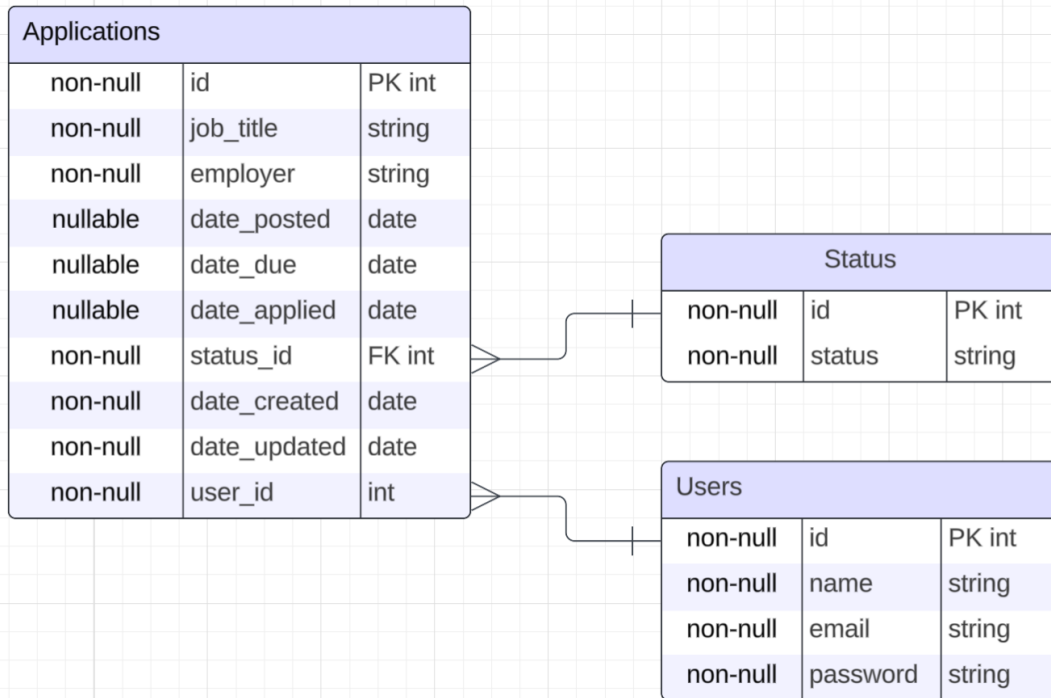

The purpose of this document is to aggregate all diagrams and other visual documentation of *The Job Journal* project into a central location. This document includes an entity relationship diagram (ERD), a unified modeling language (UML) diagram of the application's class structure, and UI global components for the website.

1.2. Audience

The intended audience for this document is the development team working on *The Job Journal* project. The Project Manager will have write access to this document. The rest of the development team will have read access. A copy of this document will be sent to WFCB for review.

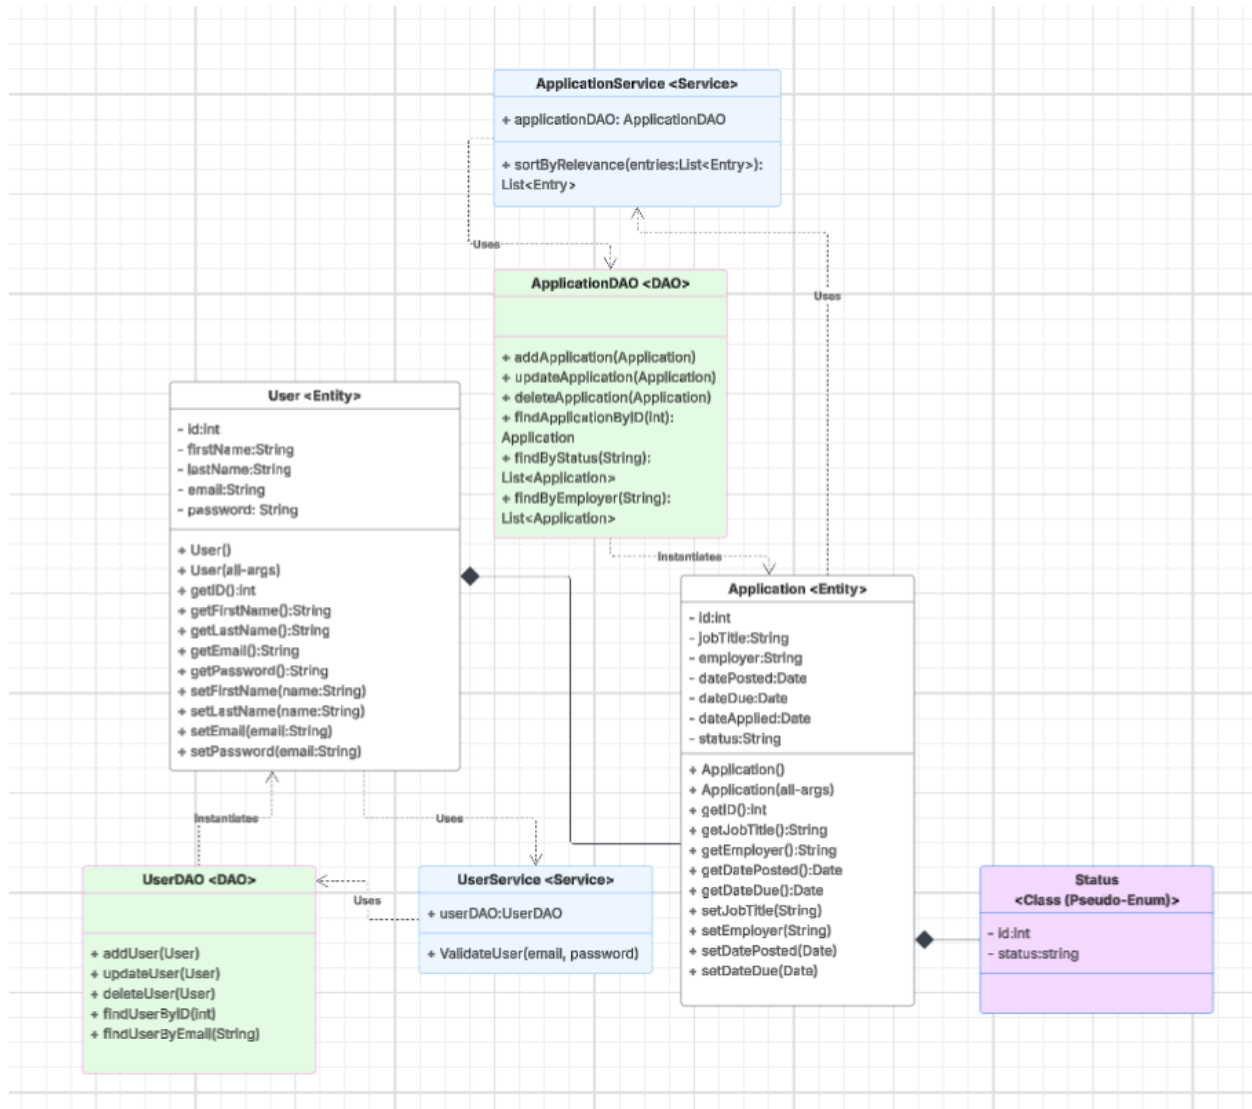

Section 2. Database

Below is an ER diagram representing the overall database design of the MVP (Minimum Viable Product).

Section 3. Class Structure

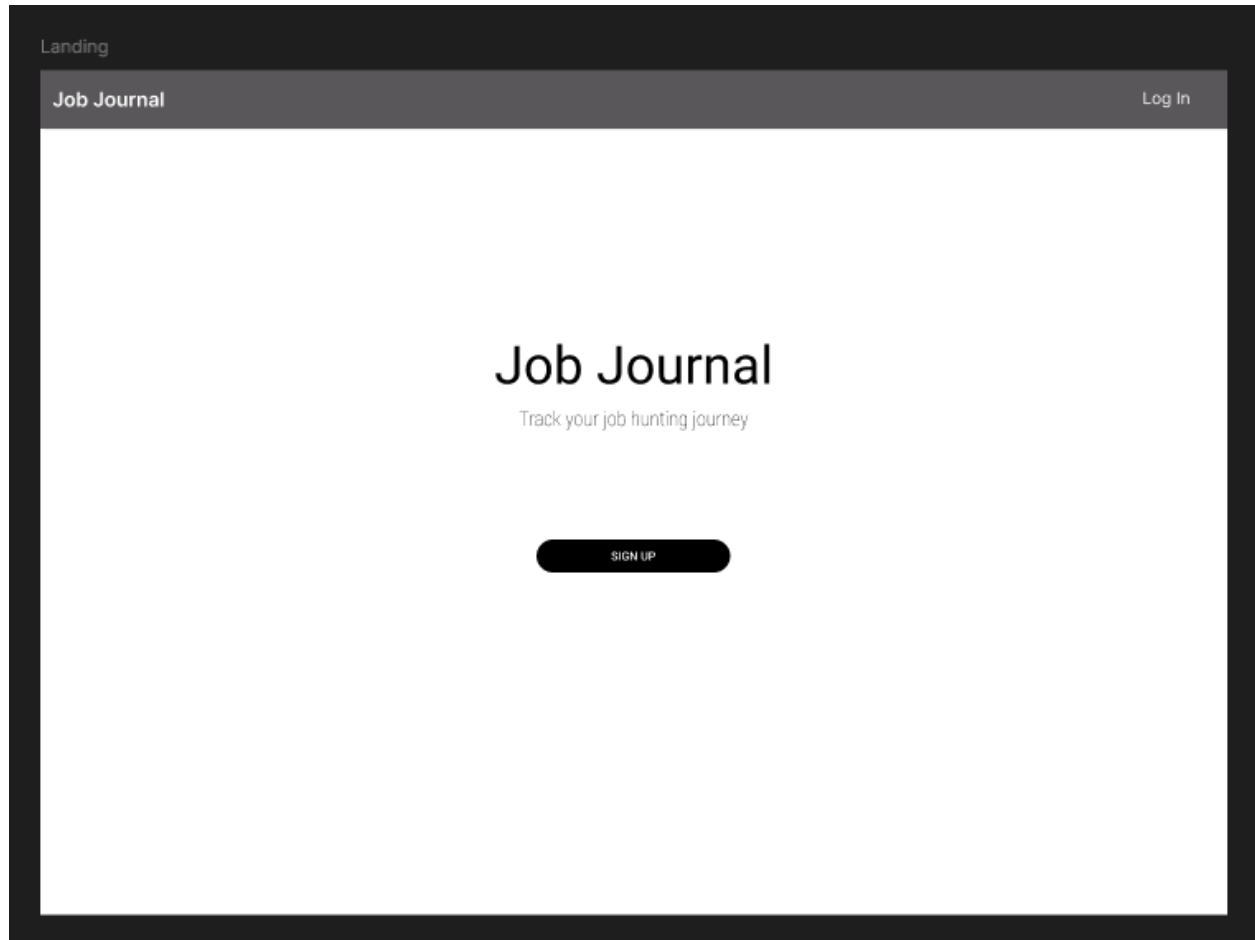

Below is the complete UML diagram of the class structure of *The Job Journal*.

A larger version of this diagram has also been stored in the project documentation directory.

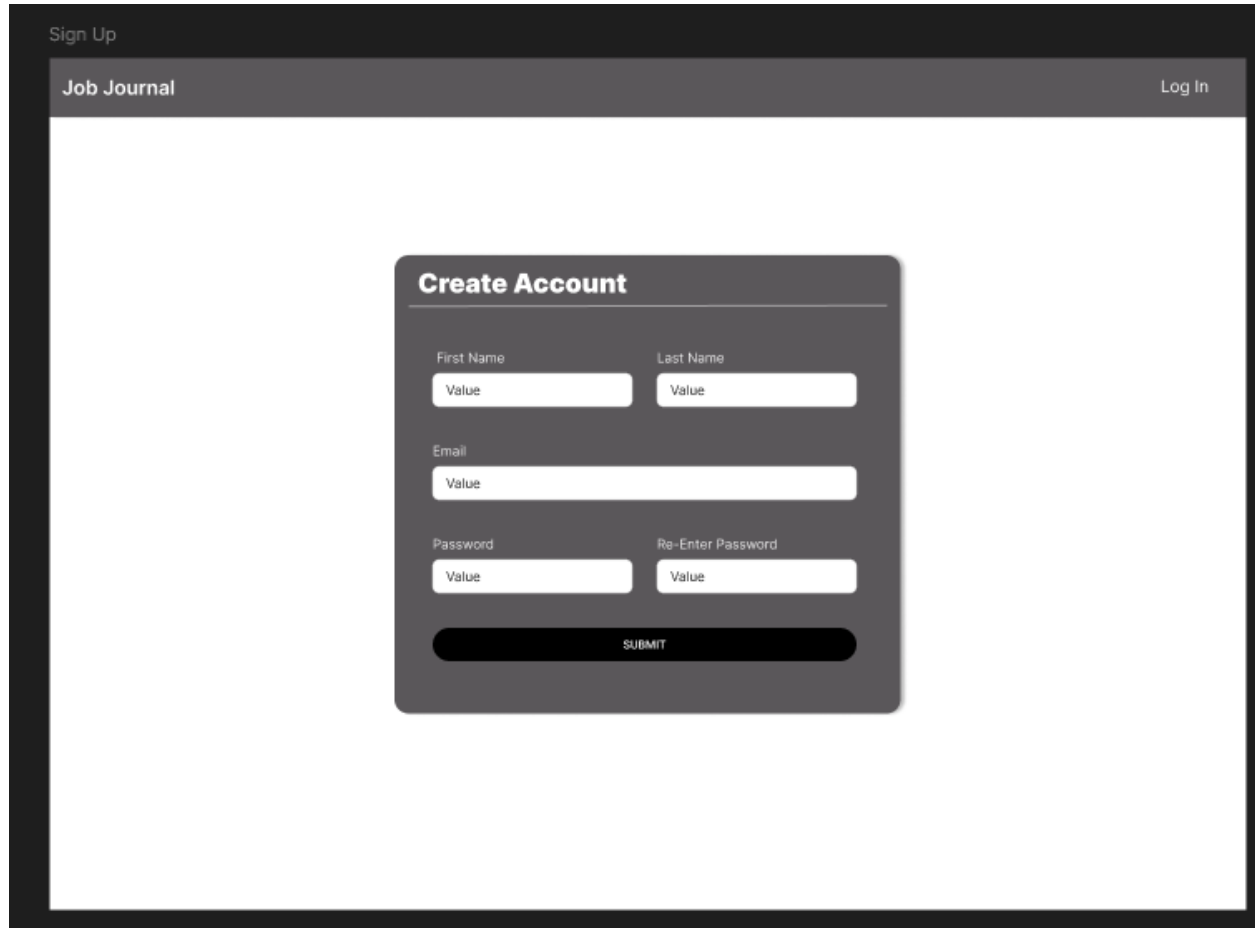

Section 4. High-Level Wireframe

Landing

The home page that the user will enter from.

Sign Up

The image shows a web page design for a 'Sign Up' form. The page has a dark grey header bar with 'Sign Up' on the left and 'Log In' on the right. Below the header is a dark grey navigation bar with 'Job Journal' on the left. The main content area is white and contains a dark grey rounded rectangle titled 'Create Account'. Inside this rectangle are four input fields: 'First Name', 'Last Name', 'Email', and 'Password'. The 'Password' field is followed by a 'Re-Enter Password' field. All input fields have a 'Value' placeholder. At the bottom of the 'Create Account' box is a dark grey 'SUBMIT' button.

Application Board

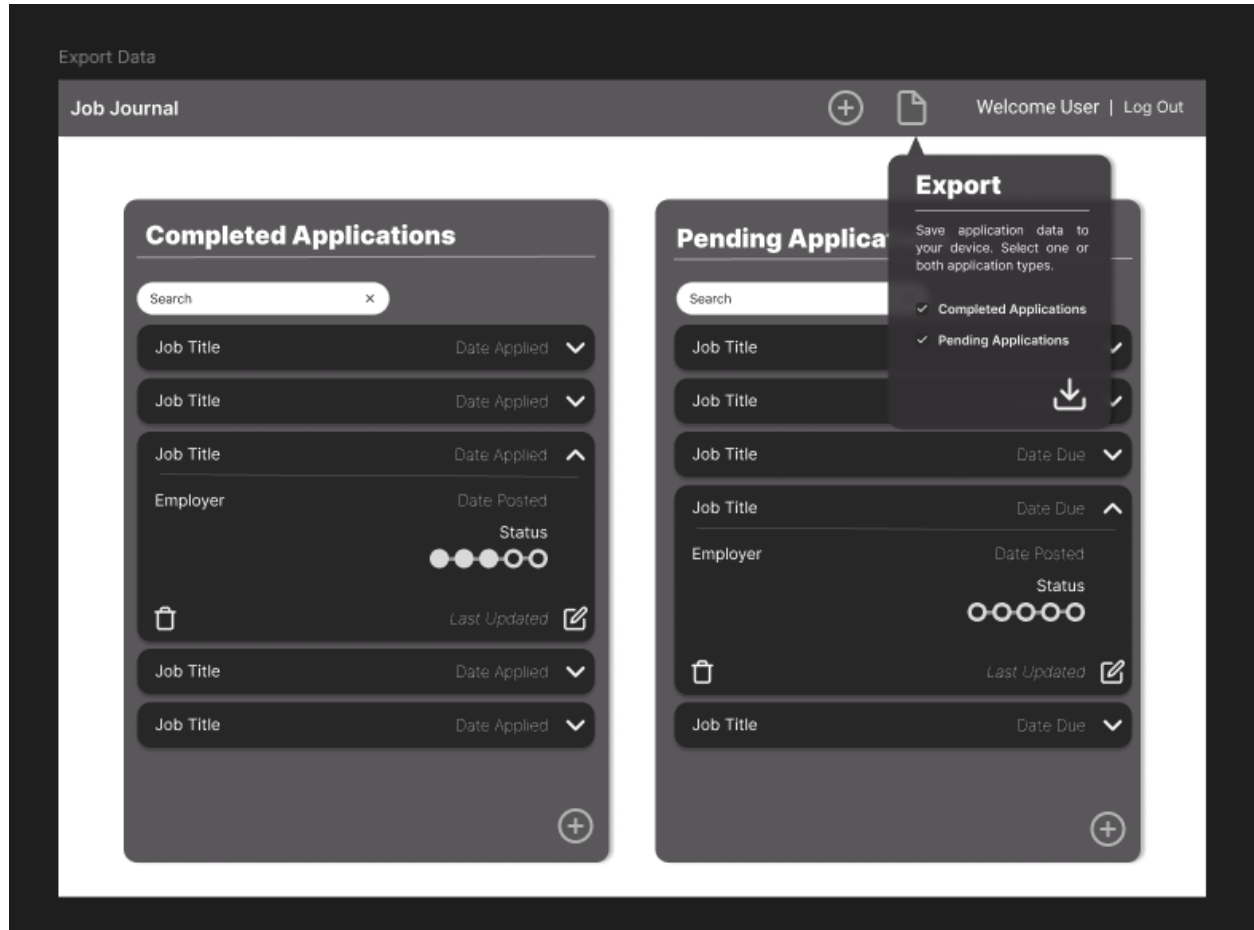

This page shows a list of all the applications they've added.

New Application

The screenshot shows a web application interface for 'Job Journal'. At the top, there's a header with 'Job Board' on the left, a '+' icon and a document icon in the center, and 'Welcome User | Log Out' on the right. Below the header, the main content area features a 'New Application' form. The form has a title 'New Application' and a toggle switch for 'Sent' with the text 'Toggle if the application has been sent'. Below this are input fields for 'Job Title', 'Employer', 'Date Posted', and 'Date Applied', each with a 'Value' placeholder. The 'Date Posted' field has a hint 'Date the employer posted the job.' and the 'Date Applied' field has a hint 'Date the application was submitted.'. There is also a 'Status' dropdown menu with a 'Value' placeholder and a 'SUBMIT' button at the bottom. A notification bubble from 'Amber 17 days ago' is visible, stating: 'Note: toggling sent off changes Date Applied field to Date Due'.

This page allows the user to submit a new application. When “Sent” is toggled, date due will switch to date posted.

Export

The button in the top right allows the user to save an excel document of their applications.
